DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 9, paragraphs 3 and 4, filed 1/17/2006, with respect to the inlet generating a flow path that is eccentric to the inlet pipe and as far away as possible to the outlet flange have been fully considered and are persuasive. The rejection of claims 10, 28, and 39 has been withdrawn.

Allowable Subject Matter

2. Claims 1-44 are allowed.

3. The following is an examiner's statement of reasons for allowance: U.S. Pat. No. 4,413,646 (Platt et al.) discloses a control valve body comprising an inlet (13 having an inlet passage (15), a nozzle area (the portion of element 15 near element 18 in figure 1), a nozzle throat (the step on the contoured surface above element 23), and an outlet (17) but lacks the nozzle throat being sloped and the nozzle throat having surfaces tangent to a direction of fluid to inhibit flow separation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
